FRIDAY, OCTOBER 13, 1922.

### Success of the Bond Issue.

The Government's new bond issue, to pay 414 per cent, interest and run or twenty-five to thirty years, is o sweeping and splendid a success the books are closed it may be oversubscribed three or four times. In fact it may be so heavily oversubscribed by reason of the offerings of Victory notes and Treasury certificates for conversion into the new bonds that the contemplated issue of half a billion of dollars may have to be far exceeded.

Secretary MELLON has announced that subscribers for \$10,000 or less may all get their allotments if their applications are in by noon to-morrow. These subscriptions may cover the greater part of all the primary half billion bonds, because investors wishing large blocks of these choicest securities in the world, but realizing a single big subscription would be sharply scaled down, will naturally avail themselves of the chance, under the ten thousand dollar ruling, to put in many applications for \$10,000 each through various persons subscribing

If the whole primary issue is thus covered by the cash subscriptions the offerings of Victory notes and certificates, virtually unlimited by the Secretary of the Treasury, may carry the new issue to very big proportions, although it was the first intention to confine it to the \$500,000,000 or about that amount.

In any event the sensational success of the Government's new bor-MELLON's great fiscal policy. Some the twenty-five to thirty year bonds on a 4 per cent. basis. Possibly the ests of its commerce should require." this country had sounder foundation of the laws of that nation of the laws of that nation of the laws of the la But the experienced banker and financial genius who now heads the Treasury Department with an ability never surpassed in the history of the country could not have justified himself in taking the risk of either a clear

failure or a doubtful success. With no war fervor to inspire subscriptions as a patriotic duty and with all the refunding of Government obligations ahead of the Government. amounting to some two and a half billions of dollars in the almost immediate future and further billions to come on the heels of that, the thing of paramount importance in the situation was first to display signally to all the world the matchless credit of the United States Government, as evidenced by the rush for its offered securities, and secondly to give a concrete example of the capacity of American investors, big and little, to take their Government's bond offerings by the billions of dollars.

Secretary Mellon's vision and judgment have been strikingly vindicated by the results already achieved with this superb investment offered to the American people and effectually distributed among small
